DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see pages 4-6 filed 9 June 2005 with respect to claims 1-14 have been fully considered and are persuasive. The 35 U.S.C 102(e) Rejection of claims 1 and 10 has been withdrawn. The 35 U.S.C 103(a) Rejection of claims 2-9 and 11-14 has been withdrawn.

Drawings

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "demultiplexing/multiplexing" must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Art Unit: 2638

3. Applicant's drawings do not illustrate any time demultiplexing device (Figure 5 appears to illustrate a wavelength demultiplexing device). Furthermore, there does not appear to any type of multiplexing device illustrated in the drawings.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 1-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
6. Claims 1-14 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential structural cooperative relationships of elements, such omission amounting to a gap between the necessary structural connections. See MPEP § 2172.01. The omitted structural cooperative relationships are: Applicant claims an optical pulse addition device for demultiplexing/multiplexing a plurality of time-division multiplexed (apparatus) optical signals ... However, applicant has recited an intended use of the device but not indicted the structure such as a multiplexer or demultiplexer for accomplishing the claimed task.
